

WecSec

# Secure systems. Measurable success.

WecSec offers individual solutions for complex standards and develops tailor-made and needs-oriented solutions for your information systems.

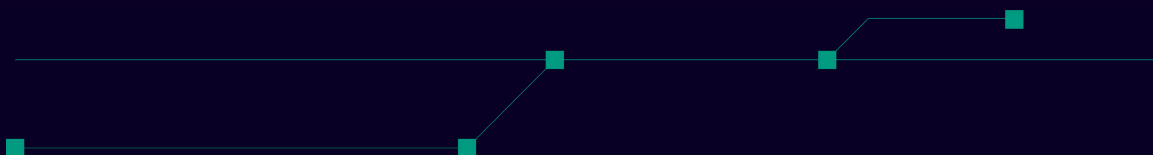

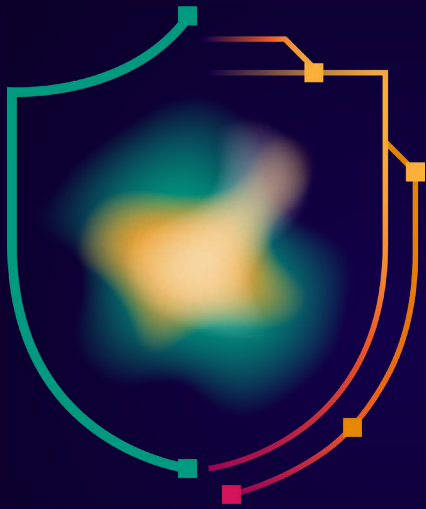

# The WecSec Group.

Our team has many years of knowledge and consulting experience. With employees in Germany, Malta and Texas (USA), we serve international clients from the insurance and banking sectors, the gaming industry, the automotive sector and other economic segments.

**State-of-the-art expertise, customer focus and team spirit are among the core values of the WecSec Group.**

# Our Range of Services

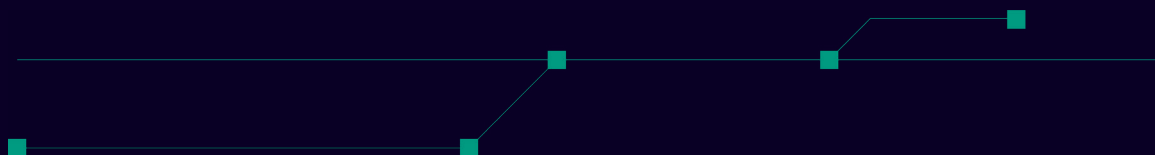

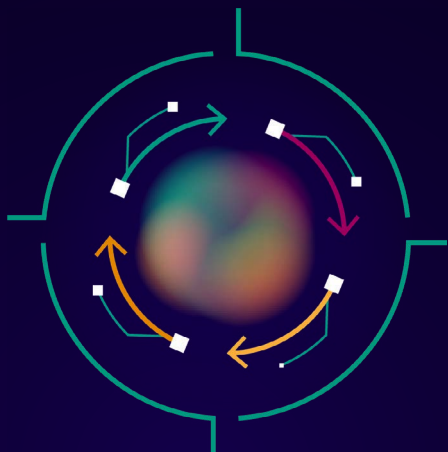

With our extensive expertise, we offer you individual solutions for your requirements. We create tailor-made concepts that fit into your existing structures and processes as much as possible.

*We create clarity.  
We identify risks.  
We assess dangers.  
We secure systems.  
We strengthen strategies.*

- Information Security
- Cyber Security
- Business Continuity Management
- Data Protection
- Risk Management

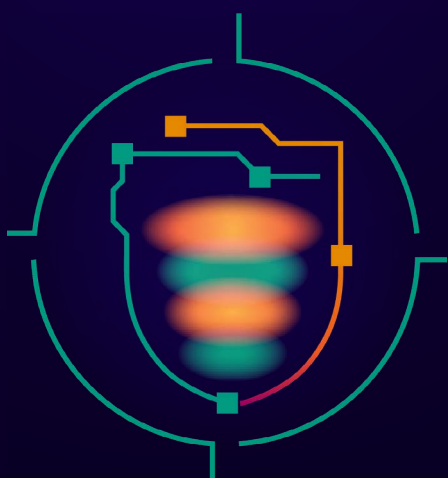

## Information Security

*Focus on the Entire Organisation.*

Planning, implementation, maintenance and continuous improvement of the security of your information, based on a management system (ISMS).

↳ **The confidentiality, integrity, availability and authenticity of information are the established protection goals.**

**GET TO KNOW MORE**

## Cyber Security

*Protection of Your Systems, Data and Infrastructure.*

Establishment and operation of a cyber security management system to control your IT security.

↳ **Support in setting up and operating the management system structure, consultancy on related topics, analysis of the required level of detail.**

**GET TO KNOW MORE**

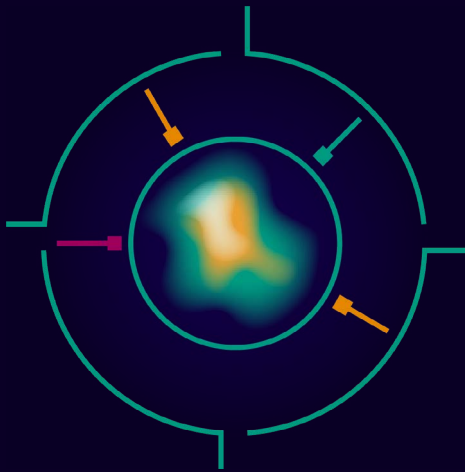

## Business Continuity Management

*Your Safety Net in Case of Emergency.*

Development of strategies, plans and actions to minimise the impact of operational disruptions.

↳ **Consultancy and support based on international standards such as ISO/IEC 22301, development of individual process plans, integration of the BCMS into an existing ISMS.**

**GET TO KNOW MORE**

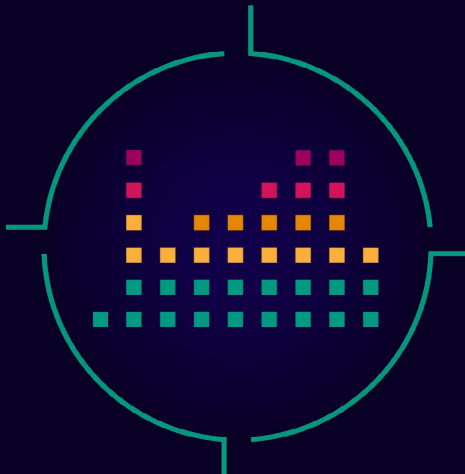

## Data Protection

### *A Challenge for Organisations.*

Data protection management and integration into corresponding management systems according to international standards.

↪ **Support with the integration of GDPR requirements into your existing management systems, if necessary taking on the position of data protection officer, advising multinational companies.**

**GET TO KNOW MORE**

## Risk Management

### *The Central Element of Management Systems.*

The basis for your entrepreneurial decision-making – for the entire organisation or individual areas.

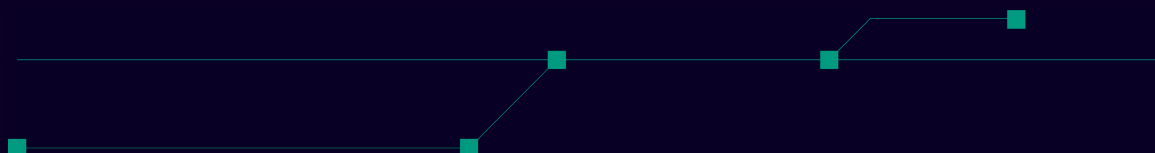

↪ **Risk assessment based on verifiable and understandable criteria.**

**On request, assessment of “non-financial risks”, operation of interfaces to the area of classic “financial risks”.**

**GET TO KNOW MORE**

## *Complete Packages*

Our different packages can easily and flexibly be combined to Integrated Management Systems (IMS): professional solutions from a single source with clear price advantages.
